The Hotels has purchased and will take delivery on December 20th 2019 the first operational commercial electric bus in Ireland. The drive for this project is to roll out a zero-carbon product. The Local community, staff & hotel guests will all benefit with cleaner air and no noise pollution.

Dublin Bus

Dublin Bus has taken delivery of its first hybrid double-decker buses, part of a programme to scale-up use of such vehicles, which reduce carbon emissions and contribute to better urban air quality. This initiative will reduce carbon emissions and contribute to a better urban air quality.

George Best Belfast City Airport

Belfast City Airport considers environmental sustainability to be a fundamental aspect of its approach to business and is a cornerstone of its formal Corporate Responsibility Strategy. In 2018, it became the first Airport to achieve Platinum Status for its efforts to reduce its carbon footprint.

Stobart Air

Aviation is an essential part of modern life, delivering social and economic benefits to diverse communities across the globe. We acknowledge our environmental impact and actively work to minimise it by investing in new technologies, next generation aircraft and participate in the climate debate.

The Green Technology Award

Accuvio Sustainability Software

Accuvio is an easy to use and comprehensive software solution to Global Sustainability (Carbon, Greenhouse Gas Emissions, CSR) and energy reporting. With over 250 corporate clients managing assets on a global scale from 1 to 5,000 buildings/assets across full scope 1, 2 and 3 as well as Environmental Social Governance (ESG) reporting to GRI, CDP, DJSI etc, Accuvio combines leading ease-of-use with incredible data processing power tools to deliver a user experience which exceeds expectations.

ACETECH

ACETECH™ is an award winning global manufacturer of vehicle intelligence solutions for emergency service fleets. Our solutions include cloud-based fleet management software, specialist safety & eco-friendly modules and intelligent electronic control units. ACETECH™ solutions integrate seamlessly with our client's vehicles, to boost your performance, increase efficiencies, improve safety and revolutionise the operation of your entire fleet.

AnaBio Technologies

The AnaBio Centre of Excellence for Encapsulation was officially opened in March 2018. Their principles are minimising waste, conserving energy and resources, re-using and recycling and community involvement. Green technologies have been applied in office, laboratory, logistics and production.

Irish Manufacturing Research

Project ICEhOuSE is a software application that will optimize industrial chilled water systems through intelligent control. The solution utilizes existing data sets typically found in industrial facilities and has demonstrated energy & CO2 reductions between 10-40% to-date.

JV Communications & Ermen Systems

JV Communications & Ermen Systems are market leaders in creating bespoke end-to-end energy and water efficiency solutions for businesses of all sizes. JV & Ermen Systems provide smart products that deliver cost reductions and environmental benefits for their clients.

SmartWater.ie™ Platform - Central Solutions

Resulting from 15+ years of collaborative R&D effort across hundreds of manufacturing and service sites, the SmartWater™ Platform offers integrated access to a suite of innovative and powerful water stewardship tools and supports, enabling water users to manage, monitor & optimise their water usage.

earth2earth®

Thorn Environmental Ltd, owners of the earth2earth® brand of environmentally friendly products, in production since 1998, shifted their focus to reducing and eliminating Co2 in all its products due to the impending climate crisis caused by excess CO2. This change in focus has resulted in our Bio-based carbon negative range

Woodco Renewable Energy

Woodco is at the forefront in developing disruptive technologies to deal with today's pressing issues of climate change, increasing agricultural emissions, food security and sanitation treatment solutions for an increasing global population. Woodco uses the very latest in IoT and Artificial Intelligence to digitize resource recovery through the Circular Economy.

The Sustainable Energy Achievement Award

AbbVie in Ireland

AbbVie continue to make progress on its absolute environmental sustainability targets relative to the 2015 baseline, even as the business continues to grow. Energy consumption was reduced by 6% across the sites in 2018 and once again the savings exceeded €200,00

Aldi Ireland

Aldi Ireland has achieved a 53% reduction in carbon emissions per square metre of sales floor compared with 2012. They have also maintained their ISO 50001 energy management certification, joined the Origin Green Sustainability Programme and in 2019, became a carbon neutral company.

Alexion

Alexion commenced operations @ College Park Blanchardstown in 2015 and from day 1 Environmental Sustainability & Energy Management has been a key consideration from design right through to day to day site operations. The site has made significant energy & carbon reductions and has robust metrics

An Garda Síochána

An Garda Síochána is the first police force in the world to achieve certification to best practice energy management standard ISO50001. AGS is highly regarded in its approach towards energy and environmental management and continues to be a global leader in sustainability.

Gas Networks Ireland

Gas Networks Ireland is committed to sustainability and delivering Ireland's low carbon energy future by targeting initiatives such as compressed natural gas for transport, renewable gas and carbon capture and storage. Our Vision is for Ireland's Gas Network to be Net Zero Carbon by 2050.

The Green Energy Provider Award

Energia

Energia is among Ireland's leading sustainable energy providers, supplying over 1 GW or 25% of Ireland's wind power. Energia wind farms produce 818,714 MWh of electricity annually, equal to 502,000 barrels of oil. In 2019 Energia announced a €3 billion investment in renewables over the next 5 years.

Enerpower

Founded in 2005, Enerpower supplies reliable, quality products and services using unparalleled energy sector knowledge to guarantee energy savings. Enerpower provides a wide range of cost effective & sustainable energy solutions for public, industrial, commercial and agricultural customers.

Gas Networks Ireland

Gas Networks Ireland is committed to sustainability and delivering Ireland's low carbon energy future by targeting initiatives such as compressed natural gas for transport, renewable gas and carbon capture and storage. Our Vision is for Ireland's Gas Network to be Net Zero Carbon by 2050.

Naturgy

Naturgy are experts in energy and energy supply. Naturgy supplies natural gas, electricity, renewables and energy services such as new gas connections to large energy users in Ireland, Northern Ireland and the UK. Naturgy provides expert advice that ensures our Customers can make the best choices.

PV Generation

OUR ETHOS is Quality innovation. PV Generation was Founded in 2015, when we determined the cost of Solar PV Systems started to make ECONOMIC sense. We now have a genuinely sustainable energy choice suitable for all the people of Ireland. We never compromise on QUALITY, of PRODUCT, INSTALLATION or SERVICE

SSE Airtricity

SSE Airtricity, is proud to provide 100% green electricity, gas and essential services to Irish homes & businesses. SSE Airtricity is committed to engaging this generation to collaborate with them, one small step at a time, and be part of Ireland's green energy journey - 'This is Generation Green'.

Thorntons Recycling

Thorntons Recycling founded in 1979 is one of Ireland's most innovative & progressive waste management and recycling companies in Ireland achieving a 94% recycling and recovery rate. Thorntons Recycling create over 100,000 tonnes each year of fuel from waste for the cement industry in Ireland.

Vivid Edge

Vivid Edge delivers energy-efficiency-as-a-service to large multinational companies. Their disruptive model helps businesses upgrade their biddings, cut costs & carbon emissions, with no capital outlay. A finalist in the prestigious Cartier Women Initiative Awards 2019. Vivid Edge is making a meaningful impact on climate action.

Woodco Renewable Energy

Woodco is at the forefront in developing disruptive technologies to deal with today's pressing issues of climate change, increasing agricultural emissions, food security and sanitation treatment solutions for an increasing global population. Woodco uses the very latest in IoT and Artificial Intelligence to digitize resource recovery through the Circular Economy.

The Excellence in Waste Management Award

AbbVie in Ireland

AbbVie continue to make progress on its absolute environmental sustainability targets relative to the 2015 baseline, even as the business continues to grow. Energy consumption was reduced by 6% across the sites in 2018 and once again the savings exceeded €200,000.

ABP

We have had success and achieved much of our 2020 targets ahead of time but we will continue our journey and seek out further improvements across the Group. We will continue to adapt global best practice and continue to be a sustainability leader for the food and drink sector in Ireland.

Ashford Estate

The Ashford Estate has developed and implemented a strong infrastructure when it comes to approaching our waste management. These efforts are spearheaded by our new and innovative Green Purchasing culture and commitment to completely eliminating SUP's by 2022.

Brown Thomas Arnotts

This year Brown Thomas Arnotts have reduced waste, grown recycling, eliminated Single Use Plastic coffee cups, straws, cotton buds, wipes and plastic bags, introduced reusable carriers made from recycled plastic bottles, recycling of cosmetic empties and clothing take back for charity.

Dawn Meats Group

Dawn Meats has a stated ambition to be “Europe’s most sustainable meat company”. The rollout of Lean 6S across the business has been key to their success in the elimination of waste streams as they partner with customers, suppliers and other stakeholders who share their commitment to sustainability.

GMC Utilities Group

The GMC Utilities Group is a civil and mechanical engineering company carrying out works in the utilities sector throughout Ireland. Our environmental culture and management practices are illustrated through our commitment to prevent pollution, protect the ecological environment, minimise carbon, promote sustainability and continually improve our environmental management practices.

Through the IKEA ‘People & Planet Positive’ strategy IKEA are using sustainability to drive innovation, transform their business, shape their investments and ensure that a sustainable life at home is an option for as many people as possible. IKEA aims to make a positive difference for all

Intel Ireland

Intel's industrial campus in Leixlip, Ireland is one of the most advanced in Europe. Intel has had a presence in the country since 1989. The site manufactures semiconductor products on Intel's 14nm process has made tremendous progress in managing its manufacturing waste over the past several years,

Lidl Ireland

Lidl operates over 162 stores in Ireland providing high quality products at market leading value. Its award winning sustainability strategy 'A Better Tomorrow' has resulted in several resource efficient waste management initiatives such as Food it Back, in-store Recycle Stations and LEAP logistics.

Ryans Cleaning

Ryans Cleaning are Ireland's & the UK's premier event cleaning & waste management company. They invest a great deal of time & resources introducing state-of-the-art, sustainable & environmentally friendly practices at venues. The impact of their efforts is far greater reaching than most businesses.

The Sustainable Water Achievement Award

Bio-Friendly

Bio-Friendly Ltd. is a small indigenous Irish company started by Brendan Gordon in Loughglynn, Co. Roscommon, in 2004 for the manufacture and supply of certified Sewage Treatment Systems. The system consists of two reinforced glass fibre tanks.

Bord Iascaigh Mhara & Central Solutions

Through innovative collaboration BIM & Central Solutions have developed and delivered a world-class Water Stewardship Support pilot programme, the first of its kind for the Seafood Industry. The programme has assisted Irish Seafood Processors in improving their water stewardship practices & impacts.

Palm Free (Zero Waste) Irish Soap

Palm Free (Zero Waste) Irish Soap Ltd. A small family business with strong a commitment to Sustainability. Making a difference by meeting the overwhelming demand for a Zero Waste, Plastic Free alternative to everyday Soap, Shampoo & Deodorant, by saving an extraordinary amount of Precious Water.

The Icewater Group

The Icewater Group aims to create a green and sustainable future for all by introducing the latest sustainability innovations to the Irish market. Icewater currently saves, in Ireland alone, a minimum of 21,787,500 plastic bottles annually and hopes to reach 80 million annual savings by 2023.

Green NGO of the Year

Bounceback Recycling

Bounceback Recycling take back over 6000 mattresses & recycle the metal and recycle and send fabric to Waste to energy partners. We provide opportunity and training for people who are disadvantaged. We have a Facility Licence and Collection permit to enable and collected 4000 in Council Amnesty days.

European Recycling Platform

Partnering with Barretstown, The European Recycling Platform created a three-year programme, 'Batteries for Barretstown' to educate Ireland on the importance of battery recycling and increase the number of batteries recycled in Ireland. The results are a 45% increase in driver collections.

St. Patrick's Primary School

The children at St. Patrick's Boys and Girls Primary School have been paying special attention to biodiversity and improving natural habitats. Education is imperative when it comes to environmental awareness. Education changes attitudes and attitudes create action!

Green Public Sector Organisation of the Year

An Garda Síochána

An Garda Síochána is the first police force in the world to achieve certification to best practice energy management standard ISO50001. AGS is highly regarded in its approach towards energy and environmental management and continues to be a global leader in sustainability.

An Post

Sustainability is at the core of everything An Post is doing. In 2019 An Post took the Sustainable Development Goals made them ours and gave them life for our employees. Whether it is a Decent place to work and our involvement with Pride or electric vehicles and zero emissions.

Dublin Bus

Dublin Bus has taken delivery of its first hybrid double-decker buses, part of a programme to scale-up use of such vehicles, which reduce carbon emissions and contribute to better urban air quality. This initiative will reduce carbon emissions and contribute to a better urban air quality.

Dublin City University

Dublin City University is committed to Sustainability at the Core, placing this as one of the university's nine strategic goals. This is reflected in the extensive work the university does in the areas of transport, energy, waste, water, biodiversity, education and community engagement.

Gas Networks Ireland

Gas Networks Ireland is committed to sustainability and delivering Ireland's low carbon energy future by targeting initiatives such as compressed natural gas for transport, renewable gas and carbon capture and storage. Our Vision is for Ireland's Gas Network to be Net Zero Carbon by 2050.

Mayo County Council

Mayo County Council is committed to tackling the Climate and Biodiversity Emergency and in 2019 continued to show leadership and to empower others through innovative actions, publications, events and green-enabling service provision.

Waterways Ireland

Waterways Ireland is an organisation committed to the sustainable development and management of the waterways under its remit, for this and future generations to enjoy.

The Green Construction Award

Cualanor, Dun Laoghaire - Cosgrave Developments

Cualanor, Dun Laoghaire, Co. Dublin offers the pinnacle of sustainable living both inside and out. Cualanor homes reflect Cosgrave's target of providing the highest quality in every detail, design, materials, construction, low maintenance components & systems and energy efficiency.

Galway Wind Park Major Project – SSE Airtricity

As Ireland moves to deliver its 2030 renewable energy commitments, Galway Wind Park has set an industry benchmark for best-in-class large scale project delivery. As Ireland's largest wind farm, it is making the most significant contribution of any renewable development on the island.

Glavloc Building Technology

Glavloc is a technology-driven offsite manufacturing company. We have developed an internationally patented building system which offers one of the world's most efficient frames with an unrivalled structural capacity.

GMC Utilities Group

The GMC Utilities Group is a civil and mechanical engineering company carrying out works in the utilities sector throughout Ireland. Our environmental culture and management practices are illustrated through our commitment to prevent pollution, protect the ecological environment, minimise carbon, promote sustainability and continually improve our environmental management practices.

John Sisk & Son

At Sisk, our behaviour is guided by our values of Care, Integrity and Excellence. We take care of ourselves, the people we work with, the environment and the community in which we work. As a construction leader our role is pivotal in moving the construction sector towards net-zero emissions.

Office for Sport Ireland - Cooney Architects

The buildings are now a prosperous office for Sport Ireland, accommodating the different sports bodies. As part of our brief, an existing shed was refurbished to accommodate cycle parking to the end-users.

Performance HQ - Irish Sailing Foundation

The Irish Sailing Performance HQ is a new home for the Irish Sailing Team. Opened in March 2019, the athletes now have a base to sail and train. It was built using recycled and repurposed shipping containers, without the need to waste materials and energy on a bricks and mortar building.

Techrete

Techrete are one of the market leaders in pre-cast cladding. Techrete promotes a green energy strategy both in the design and function of their products and in the processes used in their manufacture. All staff are encouraged to promote green awareness in all areas of the business and in their home.

The Green Tourism & Entertainment Award

Ashford Castle Estate

We are committed to our community and dedicated to social responsibility. Supporting local charities, conservation, preservation, nature, heritage and green initiatives including the personal development of each member of the Red Carnation team, is at the heart of everything we do.

Saint John of God Hospital

Over the past number of years, Saint John of God Hospital has continued to promote the health of the planet through reducing its carbon footprint. It's lowered its energy output, improved its waste and recycling operations and adapted its landscaping processes to promote a healthier environment.

The Green Pharmaceutical Award

AbbVie in Ireland

AbbVie continue to make progress on its absolute environmental sustainability targets relative to the 2015 baseline, even as the business continues to grow. Energy consumption was reduced by 6% across the sites in 2018 and once again the savings exceeded €200,000.

Alexion

Alexion College Park commenced activities in 2015 and Environmental Sustainability has been a key consideration from design right through to day to day site operations. The site has made significant achievements in Energy Management, Carbon Reductions, Waste Management & Biodiversity Enhancements

Almac Group

Almac is recognised globally as a key player in the area of biocatalyst research and development and commercial supply of chiral intermediates at multi-tonne scale in Ireland.

Pfizer Upjohn Ireland Manufacturing

Pfizer Upjohn Little Island has driven an 'OWNIT' culture, encouraging a site-wide awareness of process efficiencies and excellence in environmental awareness initiatives! The site provides colleagues, a platform to engage with the local community through worthy projects that support the sites sustainability goals & the environment!

Green Medtech Award

ACETECH

ACETECH™ is an award-winning global manufacturer of vehicle intelligence solutions for emergency service fleets. Our solutions include cloud-based fleet management software, specialist safety & eco-friendly modules and intelligent electronic control units. ACETECH™ solutions integrate seamlessly with our client's vehicles, to boost your performance, increase efficiencies, improve safety and revolutionise the operation of your entire fleet. and AVA products are providing their clients with huge cost savings while making substantial carbon savings globally.

Global Polymer Consulting

GPC is a leading independent technological services and consulting company. We provide select sourcing of materials and manufacturing engineering solutions globally; helping you to develop incisive, practical and cost-effective solutions that you and your customers really need.

Medi-Shower

Medi-Shower provides a complete anti-microbial showering system designed for the challenges in healthcare facilities. With innovative design and technology, coupled with keen focus on environmental impact, Medi-Shower delivers a system which reduces bacterial risks, minimises plastic waste, works with community organisations, delivers water efficiency, easy to maintain and locally manufactured.

Zoan BioMed

Zoan specialise in innovative orthopaedic therapies, using naturally assembled coral as the biomaterial. Our sustainable technology platform gives access to the healing potential of coral, without impacting on the endangered natural resource. We also support vibrant biodiversity programmes on site.

The Green Small Manufacturer Award

Glavloc Building Technology

Glavloc is a technology-driven offsite manufacturing company. We have developed an internationally patented building system which offers one of the world's most efficient frames with an unrivalled structural capacity.

KORE Insulation

KORE is an award-winning manufacturer of Expanded Polystyrene for the Irish and UK markets. Heavily focused on the environment and sustainability, KORE has helped save over 25GWh of energy through retrofitting works in the local community and across Ireland since 2014.

Palm Free (Zero Waste) Irish Soap

A small family business with strong a commitment to Sustainability. Making a difference by meeting the overwhelming demand for a Zero Waste, Plastic Free alternative to everyday Soap, Shampoo & Deodorant, they have expanded their operation and increased output. Currently employing 6 staff & locating to a new 5000 sqft premises.

earth2earth®

Thorn Environmental Ltd, owners of the earth2earth® brand of environmentally friendly products, in production since 1998, shifted their focus to reducing and eliminating Co2 in all its products due to the impending climate crisis caused by excess CO2. This change in focus has resulted in our Bio-based carbon negative range

The Green Manufacturer Award

AbbVie in Ireland

AbbVie continue to make progress on its absolute environmental sustainability targets relative to the 2015 baseline, even as the business continues to grow. Energy consumption was reduced by 6% across the sites in 2018 and once again the savings exceeded €200,000.

ABP

We have had success and achieved much of our 2020 targets ahead of time but we will continue our journey and seek out further improvements across the Group. We will continue to adapt global best practice and continue to be a sustainability leader for the food and drink sector in Ireland.

ACETECH

ACETECH™ is an award-winning global manufacturer of vehicle intelligence solutions for emergency service fleets. Our solutions include cloud-based fleet management software, specialist safety & eco-friendly modules and intelligent electronic control units. ACETECH™ solutions integrate seamlessly with our client's vehicles, to boost your performance, increase efficiencies, improve safety and revolutionise the operation of your entire fleet.

Butlers Chocolates

Founded in 1932, Butlers Chocolates is Ireland's premier family-owned firm dedicated to the craft of exceptional chocolate-making. Butlers Chocolates is dedicated to challenging the issues of sustainability, reducing energy inputs, minimising the carbon footprint and lessening environmental impact

Coca-Cola HBC Ireland & Northern Ireland

Delivering on its vision for World Without Waste, CCHBC is 'designing' more sustainable packs; will 'collect' the equivalent of every bottle or can it sells by 2030; & is 'partnering' with NGOs to help clean-up the planet – while continuing to reduce water, waste and energy within its supply chain

Pfizer Upjohn Ireland Manufacturing

Pfizer Upjohn Little Island has driven an 'OWNIT' culture, encouraging a site-wide awareness of process efficiencies and excellence in environmental awareness initiatives! The site provides colleagues, a platform to engage with the local community through worthy projects that support the sites sustainability goals & the environment!

Techrete

Techrete are one of the market leaders in pre-cast cladding. Techrete promotes a green energy strategy both in the design and function of their products and in the processes used in their manufacture. All staff are encouraged to promote green awareness in all areas of the business and in their home.

The Green Food & Beverage Award

ABP

We have had success and achieved much of our 2020 targets ahead of time, but we will continue our journey and seek out further improvements across the Group. We will continue to adapt global best practice and continue to be a sustainability leader for the food and drink sector in Ireland.

Butlers Chocolates

Founded in 1932, Butlers Chocolates is Ireland's premier family-owned firm dedicated to the craft of exceptional chocolate-making. Butlers Chocolates is dedicated to challenging the issues of sustainability, reducing energy inputs, minimising the carbon footprint and lessening environmental impact

Carbery Group

Carbery Group is an International Food Company, established in 1965 and headquartered in West Cork, it is owned by four West Cork dairy co-ops. Carbery supplies Cheese, Nutrition and Dairy ingredients to consumers across the globe, made from milk sourced from 1,220 family owned dairy farms.

Coca-Cola HBC Ireland & Northern Ireland

Delivering on its vision for World Without Waste, CCHBC is designing more sustainable packaging; will collect the equivalent of every bottle or can it sells by 2030; & is partnering with NGOs to help clean-up the planet – while continuing to reduce water, waste and energy within its supply chain.

Dawn Meats Group

Sustainable sourcing has been key to Dawn Meats business success and their company purpose is “providing consistent quality meat products from sustainable sources to support our rural communities, human health and nature's eco-system”. In December 2019, the company announced the setting of ambitious 2030 science-based targets approved by the SBTi.

Diageo Ireland

Grain to Glass' is Diageo's sustainability strategy. Global targets on recycling, waste, water use have been set, with specific targets for Diageo Ireland. The entry outlines the progress and achievements and shows innovation in continuing the sustainability journey as a 'green' business.

Kepak

With a global footprint, it's important that our sustainability strategy reflects that. With our CORE sustainability strategy, and by championing the UN Sustainable Development Goals through our network of 5000 employees, we want to instil pride, inspire action and use our scale for good!

Manor Farm

Manor Farm, established in 1775, has sustainability at its heart. Now part of the Scandi Standard plc which has the Vision of 'A Better Chicken for a Better Life'. It commissioned its state of the art lairage and hosted its first Sustainability week. Innovative plastic reduction is key at present.

Meade Potato Company

For over 30 years Meade Potato Company has been growing, packing and distributing fresh & prepared potatoes, fruit, vegetables & organics to retailers nationwide from our family farm & food production facility in the Boyne Valley in Lobinstown, Co Meath. We are have zero food waste and are proud to now offer Ireland's only indigenously produced food grade starch extracted from our potatoes for the manufacturing market. BRC, Bord Bia, IOFGA and Origin Green certified.

Rosderra Irish Meats

Rosderra utilise a system of Continuous Improvement based on the principles of Lean Manufacturing. Throughout our journey we have worked to embed Lean Principles across our various departments and processes, including Environmental Management & Sustainability. Our submission highlights this process.

Sustainability Team of the Year

AbbVie in Ireland

AbbVie continue to make progress on its absolute environmental sustainability targets relative to the 2015 baseline, even as the business continues to grow. Energy consumption was reduced by 6% across the sites in 2018 and once again the savings exceeded €200,000.

Brown Thomas Arnotts

Engaging, inspiring and achieving sustainability improvements can be challenging in any business. For Brown Thomas Arnotts, the sustainability team, leadership from the top down and team engagement across the business have been key to achieving their targets this year.

Carbery Group

Carbery Group is an International Food Company, established in 1965 and headquartered in West Cork, it is owned by four West Cork dairy co-ops. Carbery supplies Cheese, Nutrition and Dairy ingredients to consumers across the globe, made from milk sourced from 1,220 family owned dairy farms.

Dawn Meats Group

Aspiring to be “Europe’s most sustainable meat company”, Dawn Meats has ambitious emissions reduction targets. Team success is achieved through the rollout of Lean 6S, a Champions network, their D & I strategy, the achievement of BITC’s BWR mark, and through active supplier engagement, training more than 20,000 sustainability ambassadors and team members.

Gas Networks Ireland

Gas Networks Ireland is committed to sustainability and delivering Ireland’s low carbon energy future by targeting initiatives such as compressed natural gas for transport, renewable gas and carbon capture and storage. Our Vision is for Ireland’s Gas Network to be Net Zero Carbon by 2050.

LinkedIn & Partners

This submission recognises the progress made towards operating and managing a totally sustainable campus for LinkedIn through the teamwork, partnership and collaboration of LinkedIn Workplace and business teams together with all of their vendor partners Cagney, Gather & Gather and JLL.

MCR Group

MCR Cleaning, part of the MCR Group, is a Dublin based cleaning company servicing sites across the whole of Ireland and the U.K. Through our ÍON initiative across our group of companies, we are focused on leading the way on being a sustainable, green supply chain partner.

Poppulo

Together We are Better Poppulo's Sustainability Team was formed in 2018. Since then, they have evolved their original focus on waste to much broader sustainability awareness and initiatives which educate, inspire and enable Poppulo employees to believe that sustainability is for everyone.
